THE MOST ADVANCED
DISCREET & EFFECTIVE
INSECT LIGHT TRAP
FOR PUBLIC SENSITIVE AREAS

WE DID!

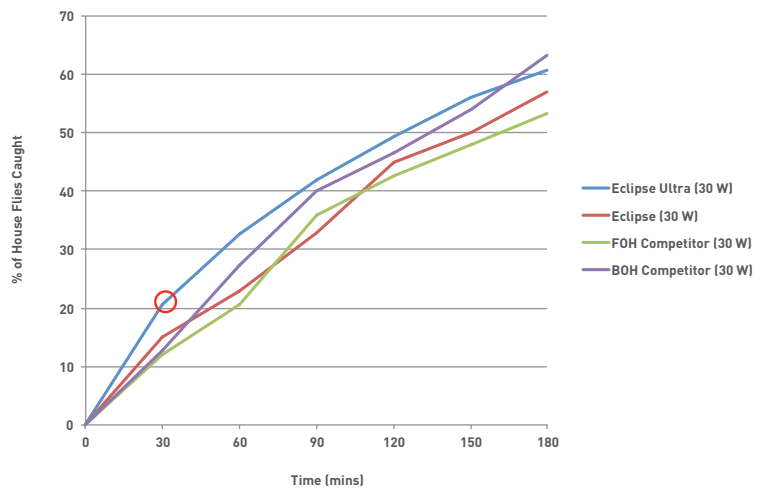

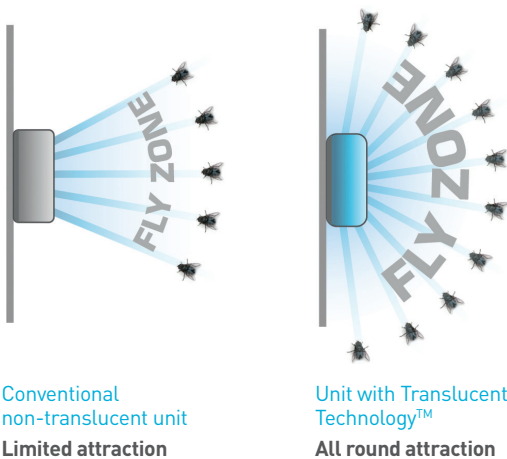

2 IN 1 INNOVATION

① MAXIMUM
FLY CATCH

② CUSTOMISABLE
FRONT INSERT

Genus® Eclipse Ultra is a new and exciting innovation in fly management for public sensitive areas. The unit provides the fastest fly catch compared to any other front of house competitor unit, with a customisable front insert for brand and promotional messaging.

FASTEST FRONT OF HOUSE FLY CONTROL:

Genus® Eclipse Ultra is the best in its class, incorporating Translucent Technology™ to provide the widest UVA coverage resulting in faster fly catch and better hygiene in front of house locations.

The Genus® Eclipse Ultra outperforms most competitor front of house units as well as some competitor back of house units, while providing complete discretion in catch. Your customers will not be disappointed.

The Genus® Eclipse Ultra has been designed and engineered to make Black Light Blue (BLB) bulbs equivalent to Black Light (BL) bulbs in fly catch efficacy. This means that the choice of bulbs to meet the customer's aesthetics will not compromise on the fly catch performance of the unit.

DESIGNED FOR FAST AND EASY SERVICING:

The Genus® Eclipse Ultra provides quick, tool free access for cleaning and servicing of the lamps and glue board. It has no sharp corners to snag fingers or catch cleaning cloths.

These features provide faster and easier servicing of the unit to keep the equipment looking good and providing peak fly catch performance.

The Genus® Eclipse Ultra uses the Brandenburg universal glue board, which allows for simplification of inventory and eliminates lost time through wasted calls with the wrong consumables.

UNIQUELY CUSTOMISABLE:

The Genus® Eclipse Ultra has a unique customisable front insert which can be changed quickly and easily at any time.

- ▶ Promote your brand
- ▶ Promote your partner's brand
- ▶ Promote sales offers

With its fast fly catch, easy serviceability and sleek design, pest control companies are now specifying Genus® Eclipse Ultra units because they are a great way to add value to their businesses.

Simply unclip the front of the unit and remove existing insert.

Replace insert with a new brand message or promotional offer in just a few seconds.

Genus® | ECLIPSE ULTRA

Genus® Eclipse Ultra fuses the latest advances in UVA transmission technology with cutting edge design and the demand for a unit which can be customised to create a unique media for brand messaging.

Product Features and Benefits:

- Incorporates Translucent Technology™ to maximise UVA propagation for faster fly catch.
- Outperforms most other competitor front of house units as well some competitor back of house units.
- 2 x 15 Watt Black Light Blue (BLB) lamps for maximum flying insect attraction. Option of Black Light (BL) bulbs.
- Customisable inserts to facilitate brand promotions and messages.
- Design led styling, silent operation, discreet and out of sight fly control for sensitive locations.
- Tool free, easy servicing to save time and money.
- Out of sight fully grid marked Brandenburg Universal glue board ensuring high catch capacity, complete discretion and HACCP compliance.
- The very latest electronic ballast to future proof the unit and ensure reduced running costs.
- Designed and manufactured in the UK.
